

How to save money

Very important tips for the wintertime

Notice:

Heating, water and all charges are not free! You just prepay for an average consumption. If you need more, you have to pay extra.

1. Never tilt windows

Keep windows closed the whole day. Open all windows completely twice a day for around 5 minutes.

2. Never shut down the heating system completely.

Put it on 1 or 2 when you leave the apartment, never on 0 or *. Increase to your individual comfort temperature when you come home. But preferably not higher than 3.

3. Don't put things on the window sill

It prevents you from opening windows completely twice a day.

4. Keep all doors closed

Always close the door after leaving a room.
